

Victoria Glen Manor Inc.

Friday, December 4, 2009 - 9:00 am

Press Release – For immediate release

Perth- Andover, NB – Construction of a new 65 bed nursing home

Yesterday the Province of New Brunswick announced that Victoria Glen Manor Inc. would be receiving funds for a new sixty five (65) bed nursing home. The new capital plan will address the demographic trends and needs in long term care and assist in the improvement of safety standards and increase quality in our nursing home.

The Victoria Glen Manor Inc. Board of Directors has been lobbying for a new facility since 1998 as the nursing home is one of the oldest in the province and is faced with many obstacles in relation to deteriorating infrastructure. In the last forty three years, there have been numerous changes to resident needs and services, and a new nursing home will help to ensure that the current delivery of high quality care is maintained. This project would not have been a reality today without the efforts and support of Dr. Larry Kennedy, MLA.

The Board of Directors President, Stephanie Ebbett-McCarthy stated, that “the new nursing home is very good news for our community. I hope that we have its continued support, as this long anticipated project moves forward”.
